Our Mission

"We provide support and services to families of children diagnosed with life-threatening medical conditions—thereby restoring the sense of normalcy in the home environment."

The Let It Be Foundation is a 501 (c)(3) non-profit organization that provides support to Southern California families . The focus is providing individualized aide to meet the needs of the family (medical accessories, sibling care, household maintenance, meals, etc.). With sponsorship and private donations, relief can be provided to overwhelmed and financially strained families.

Through The Let It Be Foundation, together with the help of the community, we can care for families that are in need-in desperate need to "just be normal." We can help them to enjoy the things, right here in their own community. We can help them to socialize and have fun. Most importantly, we can help them avoid centering their existence on a disease and focus instead on the positives that can come out of it.
